## PROFILE SUMMARY

Software Engineer with 2+ years of experience developing scalable and high-performance web and mobile applications, specializing in React.js, Next.js, Vue.js, and React Native for mobile application. Adept at transforming designs into fully responsive and accessible user interfaces, optimizing API integrations, and enhancing frontend performance. Passionate about building inclusive and user-centric applications, improving load times, and collaborating with cross-functional teams to deliver seamless digital experiences. Proficient in Agile methodologies, version control, and deployment strategies.

## TECHNICAL SKILLS

- **Frontend Web & Mobile:** JavaScript, Typescript, React, React Native, Vue.js, Nextjs, React Native, Expo, HTML, CSS, Tailwind CSS
- **Backend Development:** Laravel, Nodejs, Nestjs.
- **Database Management:** MongoDB, Postgress.
- **API Development and Integration:** REST API
- **Version Control:** Git, GitHub
- **Other skills:** Software Development Life Cycle, Agile Methodologies (Scrum), Unit Testing

## WORK EXPERIENCE

### Fullstack Engineer (Remote) | SonasDigitals

June 2025 – Present

- Developed and optimized responsive user interfaces for an AI-powered recruiting platform using Next.js, improving page load speed by 40% and ensuring seamless user interactions.

### Frontend Engineer (Remote) | AremxyPlug

February 2025 – April 2025

- Developed and optimized responsive user interfaces for an AI-powered recruiting platform using Next.js, improving page load speed by 40% and ensuring seamless user interactions.
- Converted complex Figma designs into functional, pixel-perfect web pages, achieving 100% responsiveness for web and mobile.
- Contributed in integrating RESTful APIs, optimizing data fetching and state management, reducing API call latency by 30%.
- Worked with backend developers and UI/UX designers, expediting feature delivery through efficient workflow coordination.
- Conducted and participated in code reviews to improve code quality and maintainability, which reduced bugs and ensured adherence to best coding practices.

### Frontend Engineer (Remote) | The Intern Place

March 2024 – February 2025

- Developed and optimized user interfaces for telecom, payment, and card products using React.js, improving system efficiency and user experience, and cross-device compatibility.
- Assisted with API integration, streamlining data exchange between frontend and backend services, reducing API response time by 35%.
- Implemented performance optimizations, reducing page load time by 50% through code-splitting, lazy loading, and efficient state management.
- Collaborated with UI/UX designers and backend developers, accelerating feature development and deployment speed by 30%.

### Frontend Engineer (Remote) | Netcraft Global Concerns Ltd.

June 2024 – September 2024

- Developed a dynamic and responsive user interface for an eCommerce platform, improving user engagement by 35% through enhanced navigation and UI/UX consistency.
- Converted 3 Figma dashboard designs into web pages using React.js, achieving 100% responsiveness across mobile, tablet, and desktop.
- Integrated RESTful APIs, optimizing authentication and dashboard connectivity, which reduced login time by 40% and improved data synchronization.
- Optimized frontend performance, cutting page load time by 50% by implementing lazy loading, efficient state management (Redux), and minimizing re-renders.
- Enhanced accessibility and usability, ensuring compliance with WCAG 2.1 standards, leading to a 20% increase in customer retention.

## EDUCATION & TRAINING

Software Development – BackendTrack; Seamsfix	2025
Software Development – Frontend Track; Axia Africa	2024
BEng. Mechanical Engineering; Federal University of Technology, Owerri	2021

## RECENT PROJECTS

**[JobTracker](#)** – A fullstack application for job seekers to track their job applications across different stages (Wishlist, Applied, Interviewing, Offers, etc.) in a drag-and-drop board format, similar to Huntr. Each job is represented as an editable card. Teck Stack(Web): React, Framer-motion, Nodejs, MongoDB Tech Stack(Mobile): React-native, Nodejs, MongoDB
